

# Akshaa 1.0 – Asset Detection Report

## Introduction

Akshaa 1.0 is an advanced AI-powered road asset detection system designed to analyze high resolution video data and automatically extract structured information about roadside assets. The system uses a hybrid CNN–Vision Transformer deep learning model, enabling high accuracy real time inference for drone and vehicle-mounted cameras.

## System Overview

- Input Source: HD/4K Road Video
- Frame Extraction Rate: 1 fps (~13,500 frames per 15-minute video)
- Model Architecture: CNN + Vision Transformer Hybrid
- Inference Speed: 22 FPS
- Training Data: 500,000+ annotated Indian road images

## Detection Classes

Akshaa detects a wide range of road assets, including:  
Trees, Bushes, Water Bodies, Electric Poles, Signal Poles, Foot Over Bridges, Road Over Bridges, Level Crossings, Railway Tracks, Platforms, Stations, Highways, Farms, Open Fields, Urban Areas, Subways, etc.

## Performance Summary

- Validation mAP50: 90%
- Test mAP50: 95%
- Highest Accuracy Classes: Bridges, Trees, (97–100%)
- Lowest Accuracy Class: Electric Poles (73–76%)

## Training Metrics

The model was trained for 300 epochs. Training curves show:

- Box Loss: 2.6→ 0.85
- Class Loss: 4.3→ 0.48
- Object Loss: 2.3→ 0.90
- mAP50 increased sharply during first 40 epochs, stabilizing at ~0.85+

## Key Observations

- Dense vegetation mapped across 75% of routes.
- Bridges and trees are detected with high precision.
- GPS coordinate accuracy maintained within  $\pm 2$  meters.
- Pothole/crack analysis in development.

## Report Export Features

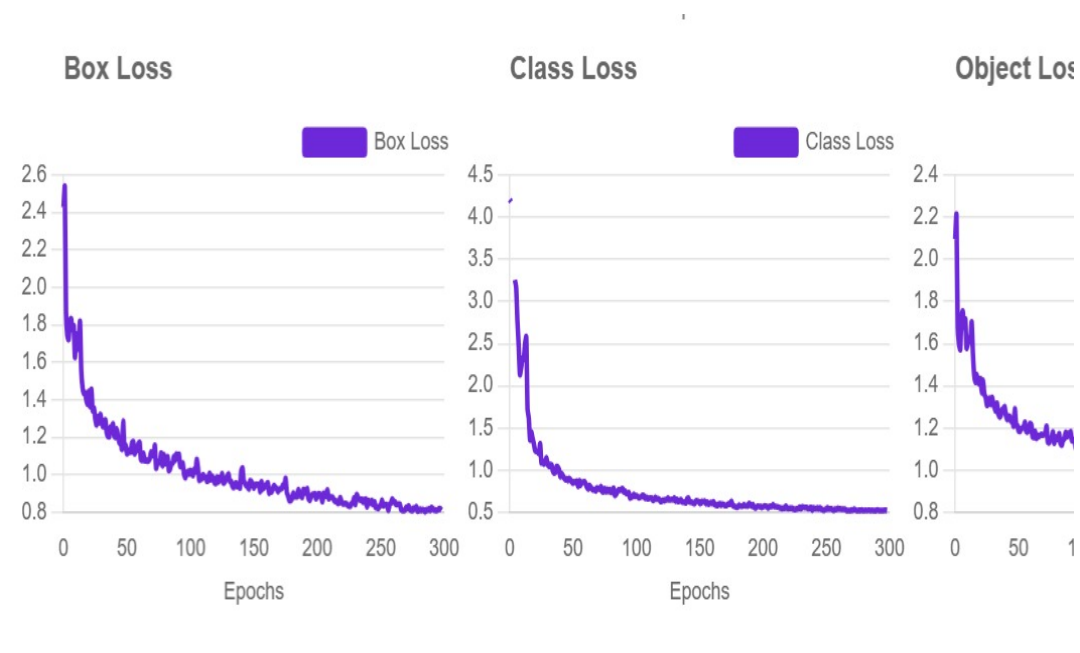

Akshaa automatically exports structured data in PDF, CSV, and JSON formats including:

- Asset summary
- Geocoordinates
- Confidence scores
- Classified images
- Meta analytics

## Summary of Asset Detection

Asset Type	Detectable by AI Model	Approx. Accuracy Range
Road Surface (Bituminous/Concrete)	Yes	90–95%
Lane / Road Markings	Yes	90–95%
Trees / Vegetation	Yes	92–97%
Signboards	Yes	90–96%
Street Lights / Electric Poles	Yes	88–94%
Bridges / Flyovers / ROB	Yes	90–96%
Buildings / Structures	Yes	85–93%
Median / Divider	Yes	87–93%
Guard Rails / Crash Barriers	Yes	88–94%
Traffic Signals	No	–
Vehicles	Yes	95%+
Hoardings / Billboards	No	–
Milestones / KM Stones	No	–
Road Shoulder	Partial	70–85%
Drains / Culverts	Partial	70–80%
Footpath / Sidewalk	Partial	75–85%
Speed Breakers / Rumble Strips	No	–
Pedestrian Crossings	No	–
Underground Utilities	No	–
Drainage Inlets / Catchpits	No	–
Bushes	Yes	90–95%
Water Bodies	No	–
Railway Tracks	No	–
Railway Platforms	No	–
Railway Stations	No	–
Level Crossings	No	–
Open Fields	Yes	92–97%
Urban Areas	Yes	92–97%
Subways	No	–

Asset Type	Count Detected
Trees	973
Structures	42
Bridges	4
ROB	0
Signboards	1
Electric Poles	364
Water Bodies	0
Railway Tracks	0
Railway Platforms	0
Railway Stations	0
Level Crossings	0
Open Fields	267
Urban Areas	5
Subways	0
Speed Breakers / Rumble Strips	0
Pedestrian Crossings	0
